

Art to Imagine a Better Future

From early 2024 we've been running imagination workshops throughout Herefordshire and Worcestershire.

We've been asking people to create stories and art to imagine a better future, thinking about what life will be like in 10 years time if humanity has done everything it can to solve the climate and nature crisis and to address other issues such as inequality. What would life be like in 2035? It wouldn't be perfect, and it would certainly be very different from today: we would be heading in the right direction and an even more positive future would be on the horizon.

We've worked with primary and secondary schools, Hereford College of Arts and Malvern Festival of Ideas and run workshops for adults, families and the scouts.

How do we travel? What do we eat? Where does our food come from?
How do we use less energy? What does government look like?
How do we cope with extreme weather?
How do we get on with each other?
How do we treat nature and animals?

How have we tackled the climate crisis, nature loss and inequality and put solutions into practice?

Artwork from a workshop with 5th Worcester Sea Scouts

Artwork by Team 12, Hereford College of Arts, October 2024.

Artwork from the Make Your Mark art class for adults at Malvern Theatres, Autumn 2024.

Here in 2035 there is a house with a grass roof and a field. It has a garden with lots of food and plants. On the other side there is a kind of street with electric cars and bicycles and plants and people; chatting, laughing, having fun. And that's what I see.
 Writing and artwork by Nefeli, age 11, Malvern Festival of Ideas workshop for families, March 2024.
